

The background is a vibrant teal color with a light gray geometric shape on the left. It is decorated with various e-commerce icons: a shopping cart, a person icon, a credit card, a dollar sign, a 'BIG SALE' tag, a 'SALE 10%' tag, and a 'BUY' button. A large, 3D-style yellow button with the text 'eCommerce' and a right-pointing arrow is positioned in the center-right. The main title is written in a large, black, serif font over the center of the image.

Presentation on E-Commerce (Online Shopping)

INTRODUCTION

The purpose of this project is that any person can sell their product online and earn cash. E-commerce is the buying and selling of goods and services, or the transmitting of funds or data, over an electronic network, primarily the Internet.

Top 7 E-commerce Websites in India

amazon

Flipkart

Myntra

JABONG

SHOPCLUES

COM

snapdeal

paytm
mall

ADVANTAGES OF E-commerce

- Faster buying/selling procedure, as well as easy to find products.
- Buying/selling 24/7.
- Low operational costs and better quality of services.
- Customers can easily select products from different providers without moving around physically.

LANGUAGES & TOOLS

- ReactJs
- IDE: VSCode

INSTALLATION

- To set up an environment for successful React development we need NodeJS and npm to be installed.
- React is a JavaScript library for building user interfaces and it is used to build single page applications.

Setting up a React Environment

- Install create-react-app by running this command in your terminal:

```
C:\Users\Your Name>npm install -g create-react-app
```

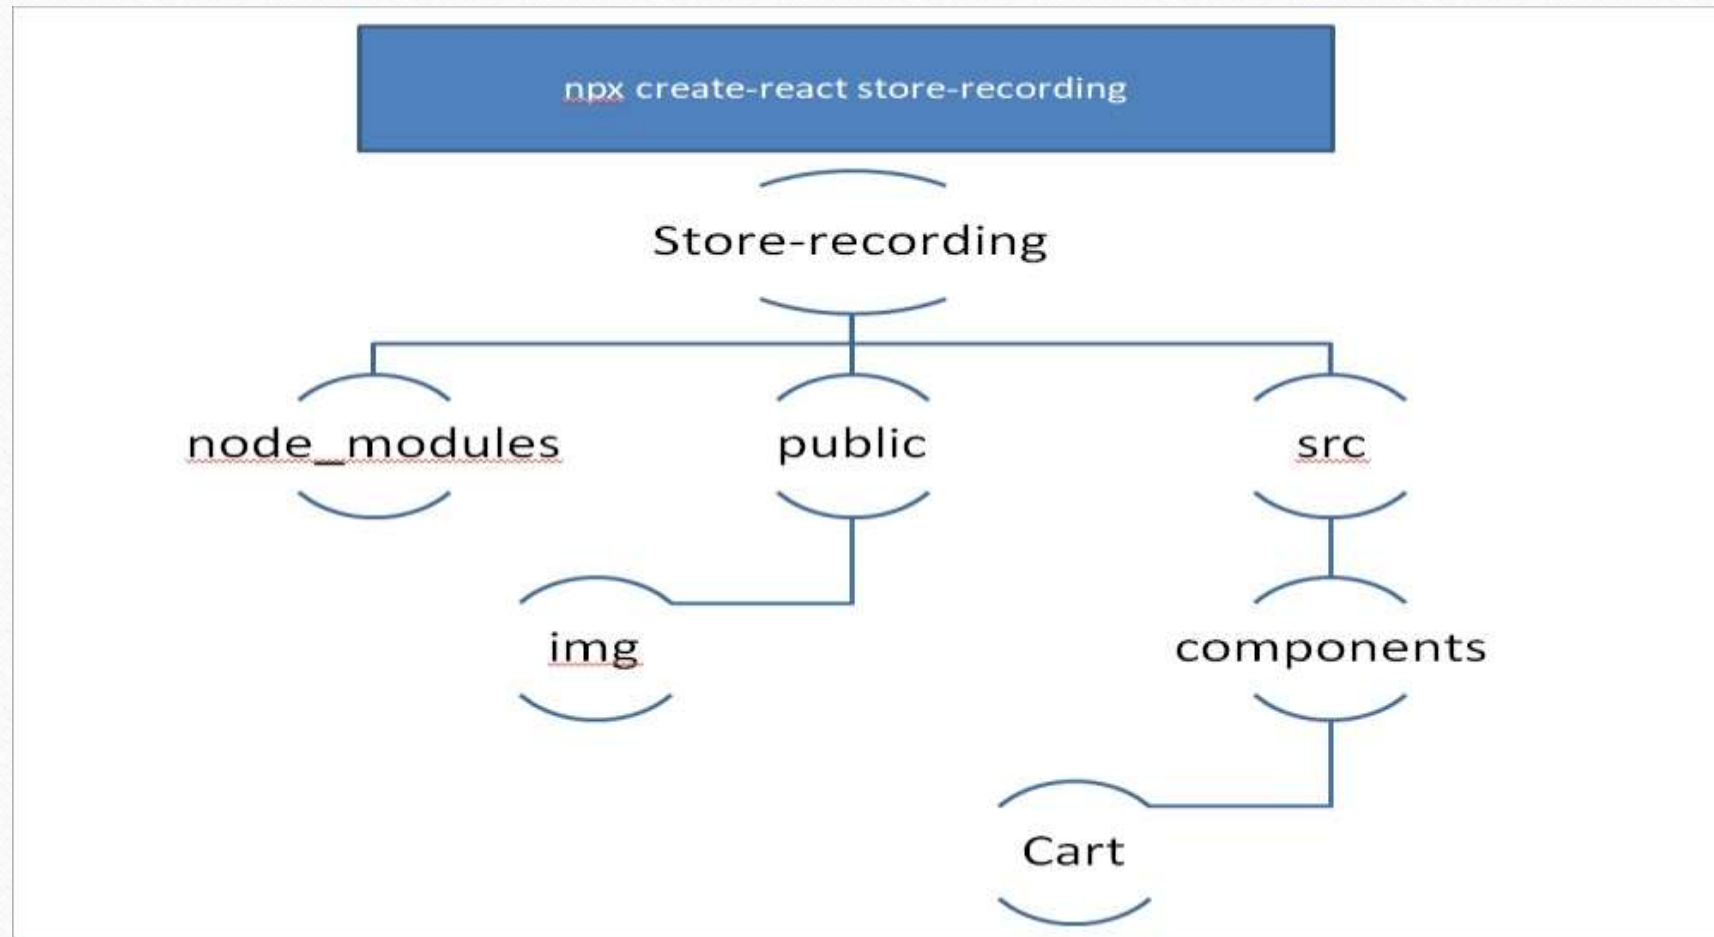

- To create a React application named store-recording run this command:

```
C:\Users\Your Name>npx create-react-app store-recording
```

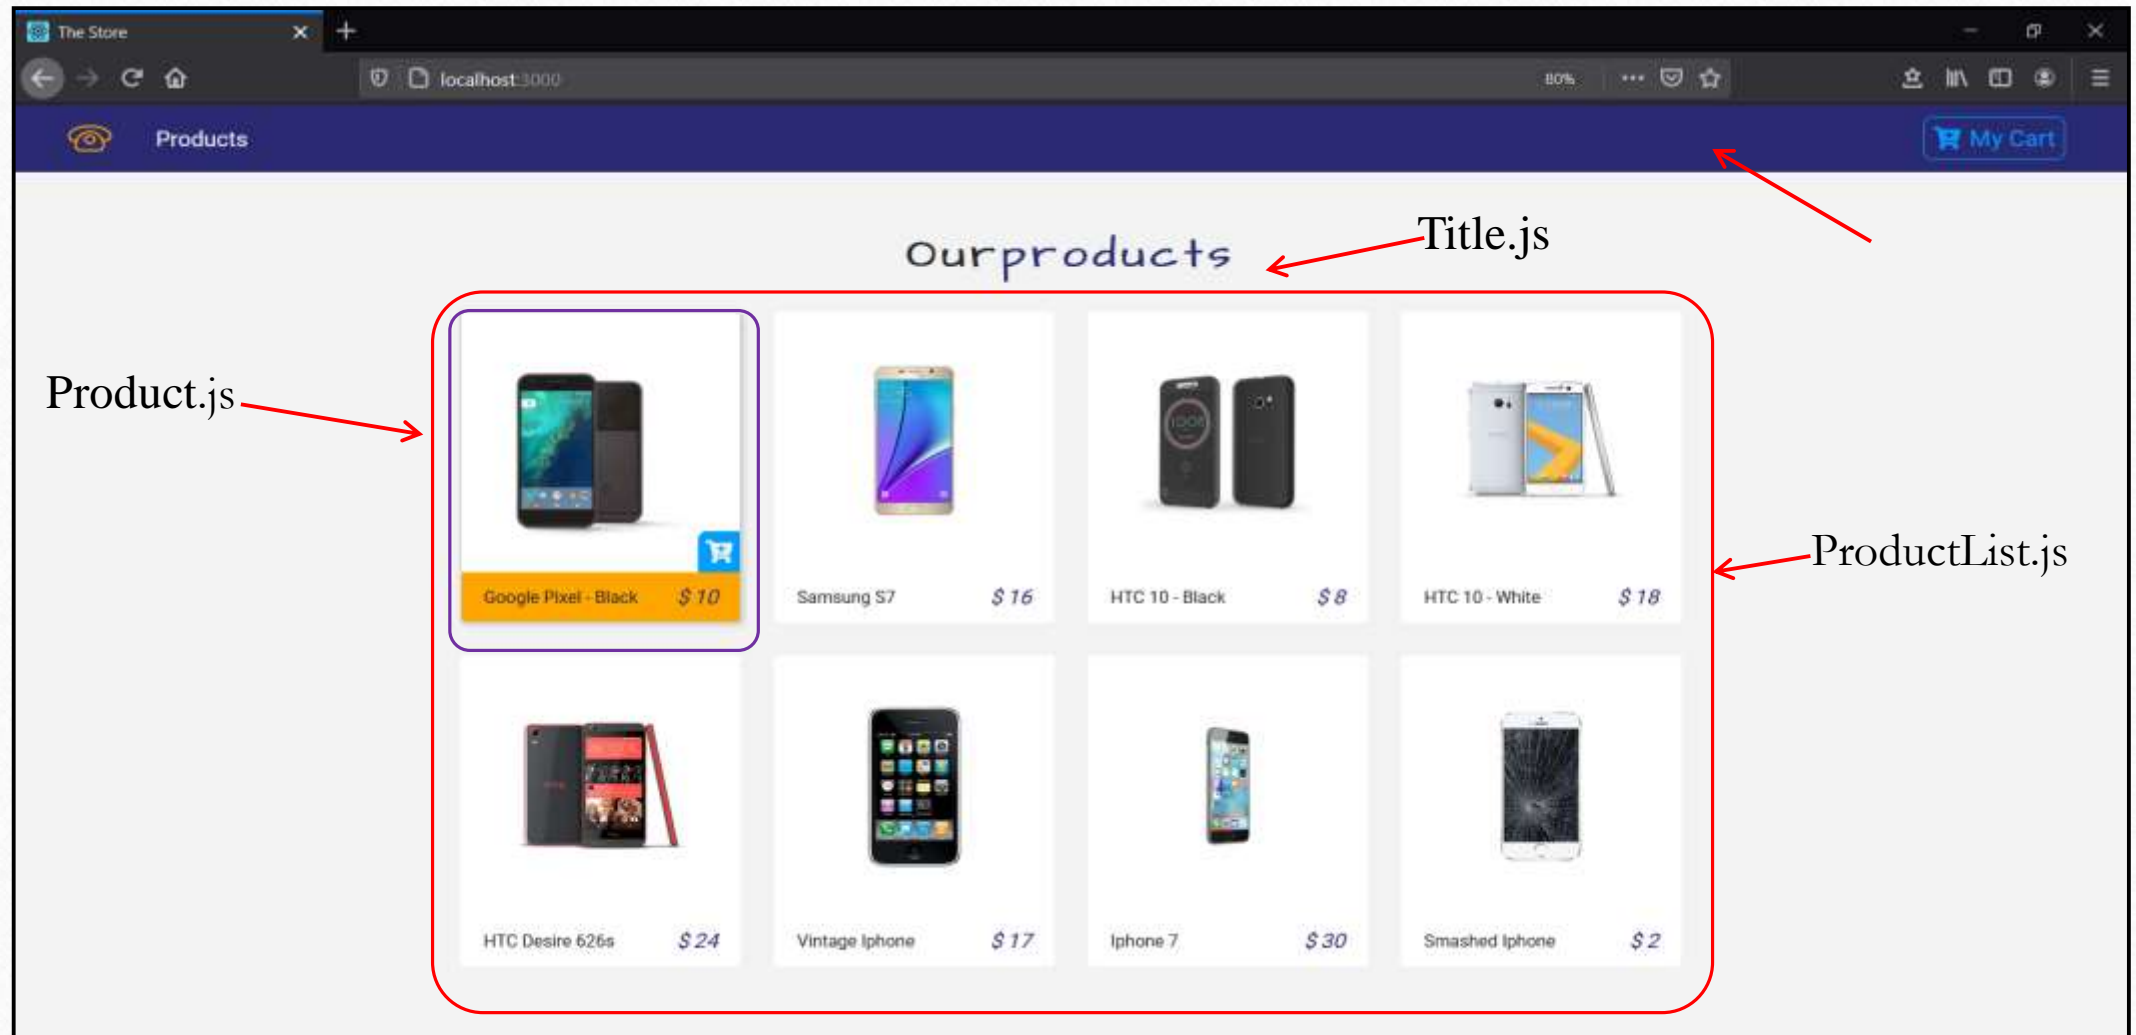

- Run this command to execute the React application store-recording:

```
C:\Users\Your Name\store-recording>npm start
```
